

Doctors and Nurses
will help meet your
palliative care needs

What is Palliative Care?

Sometimes when
people get an illness
like cancer the
Doctors cannot make
them better

Palliative care is about
making the last part
of your life as good as
it can be

Palliative care helps with all parts of your life. It cares about the whole person

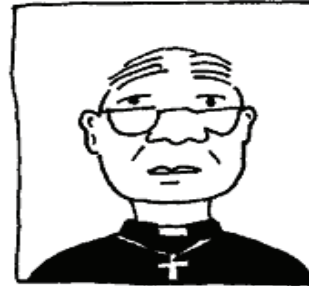

Thinking about your life and the things you want to do

Palliative care may help with:

Stopping or making your pain less

Thinking about your spiritual needs

Stopping other symptoms like feeling sick

Coping with your sadness and feelings you have about dying
