

Cervical
Screening

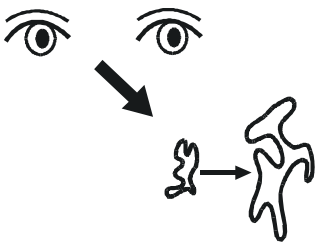

Cervical Screening

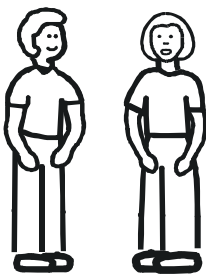

All women should keep
healthy down below.

All women should go to
go to their doctor
for a smear test.

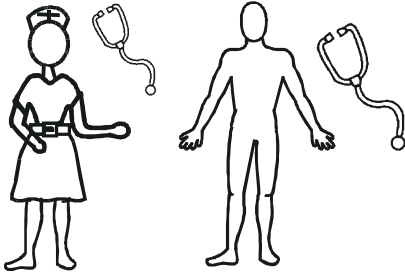

Having a smear test is a
way of looking for changes
down below.

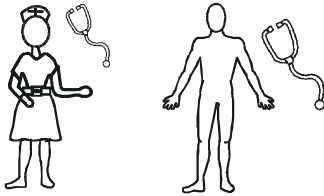

You can take someone
with you.

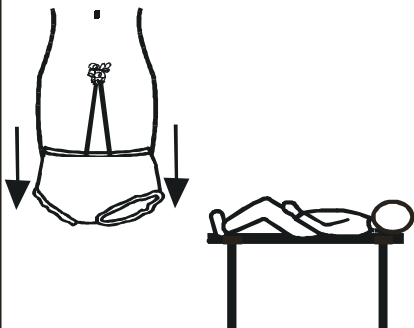

Cervical Screening

A doctor or nurse will
do the smear test.

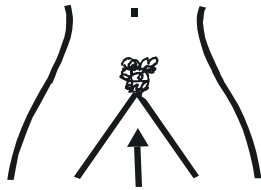

You can ask to see a lady
doctor or nurse.

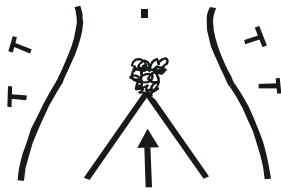

You will be asked to take
off your knickers and lie
on the bed.

Cervical Screening

A speculum is put into your
vagina and cells are
collected from your cervix.

It may feel
uncomfortable.

The cells are sent away to
be looked at through a
microscope.
