

***Your
Prostate
Examination***

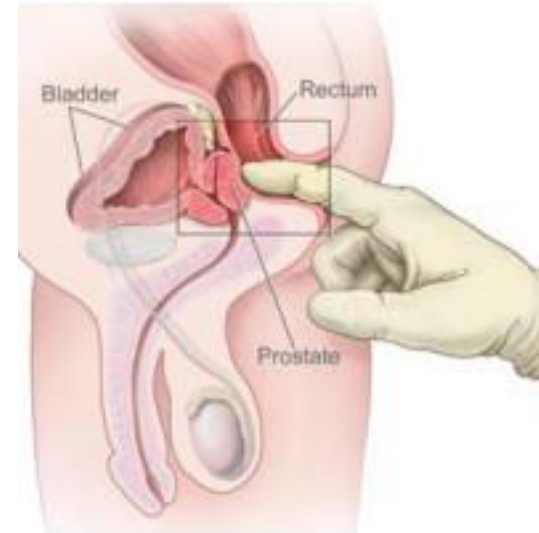

When you go to the toilet for a number 1 (a wee)

You sometimes dribble a bit in your pants afterwards

The doctor should be able to tell if there is something wrong with your prostate

The Doctor may tell you that there is nothing wrong. Or he may ask you to have some more tests

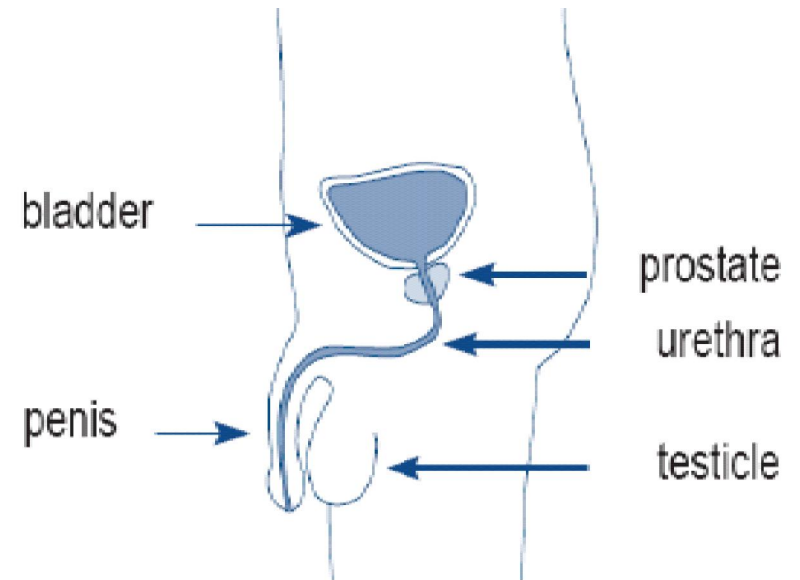

The doctor will put gloves on

And then he will put his finger inside/ up your bottom/bum

This should not hurt

This might be because there is something wrong with your prostate.

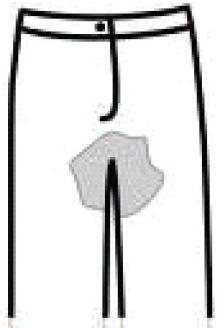

Normal Prostate

Enlarged Prostate

If your prostate get too big it can squeeze the tube your wee (number 1) comes out of.

This can make some stay in the tube and then come out later after you have finished on the toilet

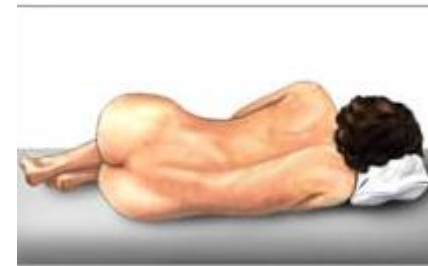

The doctor can check your Prostate

You will have to take off your pants and underpants

He will ask you to lie on the bed/ table.

You will have to lie on your side with your knees bent
