

How to check that the aid is working

***** Before you put your aid in your ear
check to see if it is working**

1. Switch the aid on. Push the switch to "M"

2. Hold the aid between your hands

If the aid whistles it shows that the hearing aid is working

If the aid does not whistle it means it is not working:

If your aid is not working do these things:

1. Change the battery (see leaflet)

If the aid is still not working then:

2. Clean the ear mould (see leaflet)

If the aid is still not working then it may be broken:

3. Phone the audiology department for an appointment
