

GONORRHOEA

	<p>Gonorrhoea is caused by bacteria</p>
	<p>It can be transmitted through giving or receiving oral sex</p> <p>Touching an infected person's penis, vagina or bottom and then touching your own penis, vagina or bottom can also transmit gonorrhoea.</p>
	<p>Some people have no symptoms at all, or some may have</p> <p>Itching</p> <p>Pain when having a wee</p> <p>A discharge from their private parts</p> <p>Pain in the area around their private parts</p>
	<p>Gonorrhoea is easily treated with antibiotics</p>
	<p>Condoms can reduce the risk of transmission.</p> <p>And always wash your hands after having sex</p> <p>Speak to your doctor or nurse about treatments and more information</p>
