

THRUSH

Thrush (also known as Candidiasis) is an infection caused by a yeast called Candida Albicans.

It is normal to have small amounts of this yeast in your private parts

Sometimes things like antibiotics, soaps and heavy sweating can cause the yeast to grow more

Symptoms include redness, rash or itching on the part of the body infected

Thrush is treated with anti-fungal creams or tablets.

Thrush can happen at any time

Keep you private parts clean and dry

Wear light cotton clothing
